Conclusions

Recommended sketch of poster:

The title should be emphasized by the use of bold-face type. When displayed the letters used should not be smaller than 15mm.

The subtitle should be printed in the same kind of lettering, but semi-bold and not less than 10mm high when displayed. This guarantees clear reading even from a distance of 2-3 meters. The text should be broken up by the inclusion of drawings and/or photos. The use of colour makes the poster more attractive and effective.
