Dear Workshop participants,

We would like to cordially welcome you at the Diabetic Cardiomyopathy Workshop organized to prepare the Consensus Statement on Diabetic cardiomyopathy. The aim of this statement is to elucidate key pathophysiological and clinical issues in diabetic cardiomyopathy, including algorithms for diagnosis and management, both from the cardiological and endocrinological point of view.

Presentations at the workshop will be used as the backbone of the future publication and therefore, please actively participate in the discussion of each section. The program of the Workshop was intentionally designed to enable creative interaction of cardiologists and diabetologists. Therefore, presentations of cardiologists are to be commented by diabetologists as invited discussants and vice-versa.

Your dynamic involvement and expertise are essential for the high scientific profile of the Workshop and the Consensus document and it will be therefore highly appreciated. We hope that, with your enthusiastic contribution, we will have a truly successful workshop.
