Application for the Nominating Committee for the ESC 2024-2026

Dear Professor Achenbach
Chair of the ESC Nominating Committee
Dear Members of ESC Nominating Committee

I'm writing to manifest my interest, availability and wish for you to consider my application for the ESC Elections for a position on the European Society of Cardiology Nominating Committee for the 2024-2026 mandate.

In all the ESC structure the Nominating Committee gets itself in a high relevance position, as it is the Committee that chooses the ESC future paths, by having the responsibility of selecting and nominating the candidates for the ESC Elections every mandate.

Being part of ESC Nominating Committee is a job of high standards, requiring the strength and recognition of several core values, alongside with the motivation to continuously pursue the ESC mission of contributing to the reduction of the burden of cardiovascular disease.

Contributing to the ESC's Association of Cardiovascular Nursing and Allied Professions over the past years, gave me a sense of how I could improve some skills and how to use them towards the ESC mission, but also helped me to showcase my core values. As they are well recognized by ACNAP endorsement of this candidacy.

This way I hope You can consider this application, knowing that I have the willingness and the drive to contribute to the ESC Nominating Committee roles in the best way I can, with a great sense of commitment and responsibility.

Moreover, this candidacy supported by ACNAP, is also endorsed by my National Society, the Portuguese Society of Cardiology, where I actively volunteer as well, as a member of the Nursing Group.

Kind regards,

Ana Filipa Gomes
