## 8. Why are you interested in joining the EACVI Board (300 words max)?

My education in the field of Cardiology has been a truly European curriculum with important internships in France, Belgium and UK. This gave me the opportunity to understand different health systems and different patient's needs across Europe focusing on cardiac imaging.

During my career I have always prioritized educational activity together with research, helping young fellows, from all over the world, to boost their career. In recent years, I have gained important international managerial experience in the field of cardiovascular imaging.

The purpose of my application is to put my passion, my motivation and my experience at service of the EACVI community:

- 1- To support the EACVI mission in this challenging time
- 2- To promote excellence in cardiovascular imaging
- 3- To promote the Young community
- 4- To increase the interaction between EACVI and other European and non European Associations.
- 5- To promote education, accreditation, training and research across Europe in the growing field of imaging in congenital heart disease.
