

Prof. Carlos PEÑA GIL. Spain

Clinical cardiologist, promoter of healthcare innovation and clinical research projects. University Hospital Complex of Santiago de Compostela. Associate Professor of Health Sciences. Faculty of Medicine. University of Santiago de Compostela.

He was Head of the Research Department in the General Sub-Directorate of Research, Teaching and Innovation in the Galician Health Service between 2009 and 2013.

Promoter of healthcare innovation projects and continuous improvement of healthcare quality (Lean Healthcare and Kaizen). Promoter of the Healthcare Innovation Platform, a tool for the promotion and management of innovation projects within the Galician Health Service. He has participated in macro projects at the organizational level such as the implementation of e-Consultation, chronic disease management programs and telemonitoring.

He has been a promoter and pioneer in Galicia of projects to implement quality improvements in the field of Cardiology (One-Stop Consultation 2003, Cardiology Teleconsultation 2010, Cardiac Rehabilitation Unit 2015, Integrated Aortic Stenosis Process 2018, CardiOncological Rehabilitation 2020).

Principal investigator and collaborator in more than 20 competitive projects, including several European projects and 11 R&D&I contracts. He is the author of more than 90 scientific publications.

He has two registered industrial property titles. He was a founding partner of a medical knowledge management company, Doutor QSolutions SL, in 2010, and of Dilemma Solutions SL in June 2018, a company that developed naevia medica, an advanced medical data management and decision support system based on rule-based AI.
