

Prof. Karim LEKADIR, Spain

Karim Lekadir is an ICREA Research Professor in the Department of Mathematics and Computer Science at the University of Barcelona.

He obtained his PhD from Imperial College London and was a postdoctoral researcher at Stanford University. He investigates new data science techniques for trustworthy and ethical AI in healthcare. He has been PI in 13 EU-funded projects, coordinated 5 Horizon projects, and was awarded an ERC Consolidator grant to investigate new AI techniques tailored to resource-limited settings.

He is currently the Project Coordinator of the DataTools4Heart project, which is developing tools for real-world data interoperability and reusability in cardiology.
