

Dr. Ola VEDIN, AstraZeneca

Ola Vedin, MD, PhD, is Executive Director and Global Clinical Head for Cardiovascular & Heart Failure at AstraZeneca, where he leads several late-stage development programs in the Cardiovascular, Renal, and Metabolism (CVRM) therapeutic area.

With a career spanning both industry and academia, Ola has served 10+ years as a cardiologist and heart failure specialist at Uppsala University Hospital in Uppsala, Sweden, and has held leadership roles at AstraZeneca and previously at Boehringer Ingelheim.

He has extensive experience as an investigator and trialist with an early focus on registry based randomized clinical trials and observational research in Sweden. He has been involved in numerous international collaborations and advisory roles, as well as in leadership roles of pivotal clinical trials.

He is passionate about advancing the science around cardiovascular clinical trials, including use of innovative approaches and pragmatic elements.
