

Dr. Laney JONES, Amgen

Dr. Jones joined Amgen in 2024 and currently serves as the Implementation Science Medical Director for the US Medical Team. Her focus in this role is to advance the standard of care for uncontrolled LDL-C and address the associated CV event risk reduction and to build a leading implementation science consortium that supports patients, practitioners and systems of care in application of guideline based medical therapy.

Prior to joining Amgen, Dr. Jones was an Associate Professor in the Department of Genomic Health at Geisinger in Danville, PA. Her research projects focused on closing the know-do gaps (i.e. implementation science) in preventative cardiology, specifically in inherited lipid disorders and improving implement ability of clinical practice guidelines. She was the PI of multiple grants from the NIH and CDC.

Dr. Jones received her PharmD from the Philadelphia College of Pharmacy at University of the Sciences in Philadelphia (now at St. Joseph's University), an MPH from the Mailman School of Public Health at Columbia University, and a certificate in Implementation Science from University of California San Francisco. She did her postdoctoral training at Geisinger and implementation science training in the Mentored Training in Implementation Science (MTIS) K12 program at Washington University in ST. Louis, sponsored by the National Heart, Lung, and Blood Institute.
