

## **EAPCI Interventional Cardiology Certification**

### **TESTIMONIALS**

**Dr. Bernhard Haring - Germany**

"The EAPCI certification exam provides a valuable learning opportunity for the theoretical basis of interventional cardiology.

This helps to provide evidence-based care for patients in daily clinical practice."

**Dr. Eric Holy - Switzerland**

"Taking the EAPCI certification exam last year together with other candidates from ESC member countries represented for me a unique opportunity to accredit my theoretical and clinical skills in interventional cardiology at an international and competitive level. Studying for the exam provided a deep-dive understanding of interventional cardiology's principles and practices."

**Dr. Geroe Besis - United Kingdom**

"This exam provides an opportunity to test the theoretical knowledge in interventional cardiology based on a well-defined curriculum. The completion of the certification process will result in a prestigious and European wide diploma in Interventional cardiology."

**Prof. Wojtek Wojakowski - Poland**

"I took the exam because as a president of the national interventional working group I recommend it to my colleagues and fellows. I wanted to get personal experience which was excellent. Our work requires continuous postgraduate education and re-evaluation. EAPCI examination and certification are essential tools in maintaining professional competence of interventional cardiologists."

**Dr. Luís Leite - Portugal**

"The EAPCI certification exam was an essential step in my training, it is a great opportunity to test your own knowledge according to the best standards of Interventional Cardiology in Europe!"

**Dr. Maged Mokbel - Romania**

"This exam represents a unique opportunity to obtain EAPCI's recognition in interventional cardiology, such a chance not to ignore or postpone. Preparing refreshed and updated my knowledge, while succeeding assured and improved my ability to make decisions."

**Assist. Prof. Mustafa Yilmaztepe - Turkey**

"I took this exam in May 2018 to assess my knowledge in interventional cardiology and I think this international certification process will provide a great opportunity to see how qualified you are."

**Dr. Santiago Camacho Freire - Spain**

"This exam was the option to certify my knowledge and skills in interventional cardiology in a standardized way, it opens a world of possibilities for working in any European country."

**Dr. Mohammady Shahin - Egypt**

"EAPCI certification is a great achievement in my personal career and added a lot to my national and international recognition as a skilled interventional cardiologist."

**Dr. Michail Papafaklis - United Kingdom**

"Participating in the first EAPCI certification was a great opportunity for me since I was about to complete my Interventional Cardiology Fellowship In London, UK. Obtaining the European Certificate in Interventional Cardiology provides me with concrete evidence regarding my training which was not available before this new initiative. The EAPCI certification helps in the standardisation of the training in Interventional Cardiology and the accomplishment of skilled young Interventionists who can work in international catheterisation laboratories. Therefore, I feel that the EAPCI certification will help me gain more recognition among the Interventional Cardiology community."

**Mr. Theodoros Sinanis - Germany**

"I have only three words: self-confidence, knowledge, professional recognition."
