

DEAR EUROHEART NETWORK

As we approach the Easter break, let's take a moment to reflect on the first months of the new phase of EuroHeart. It's been a challenging yet rewarding period, during which the collaboration was able to meet project plan expectations, among which maintaining and expanding our network of partner countries had been a key priority. But this is only the beginning !

In addition, we're excited to share that we are now on track to kick-off activities by Disease Domain group, as well as gearing up for a great ESC Congress 2025 in Madrid. More details to read in this newsletter !

EUROHEART TEAM MEETING IN LONDON

The EuroHeart team recently gathered in London on March 16th and 17th for a highly productive meeting. Over the course of two days, team members collaborated closely, sharing valuable insights and advancing key initiatives to strengthen partnerships, refine strategies, and discuss upcoming projects. A restructuring was discussed to enhance national representation and engagement. Therefore, the EuroHeart Steering Committee will be updated into a dedicated forum called the National Leaders Committee. It will include representatives from National Registries and National Leaders from each participating country, The positive momentum generated in London is sure to contribute significantly to the ongoing success of EuroHeart's mission to improve cardiovascular health across Europe.

RELEASE OF THE ANNUAL REPORT

EuroHeart has released its latest annual report, presenting 2024 data in the ACS-PCI network.. This report marks a major milestone in EuroHeart's mission to advance cardiovascular care by offering deeper medical insights and highlighting critical areas for improvement across Europe. It emphasizes a systematic approach that considers age, gender, and diabetes, ensuring more personalised care. Access to detailed data supports evidence-based clinical decisions and allows healthcare systems to learn from each other's strengths and weaknesses.

NORWAY JOINS EUROHEART!

We are pleased to welcome Norway as the 14th country joining the EuroHeart network! It will integrate its Norwegian Myocardial Infarction and Invasive Cardiology registries, which align with EuroHeart's goal to improve cardiovascular care. These government-funded registries, covering PCI and TAVI, have near-complete participation across hospitals and regions, ensuring high data quality. Norway plans to share ACS/PCI data with EuroHeart starting in 2025, with data available by June 2025. The country is open to expanding into other domains like TAVI and participating in research projects.

The Norwegian Society of Cardiology fully supports this collaboration, which is legally and ethically feasible with anonymized data.

DOMAIN DISEASE PROGRESS

ESC Congress 2025 Madrid

TOGETHER WITH
World Congress of Cardiology

29 August to 1 September

WORLD HEART FEDERATION ESC #ESCCongress #WCCardio

ESC CONGRESS 2025 MADRID

29 August to 1 September

The spotlight of the upcoming ESC Congress in Madrid will be "Global Health". It will be a key event, with EuroHeart proudly participating. One of the highlights will be the ESC TV session titled "Monitoring of contemporary care of ACS in Europe – the EuroHeart interactive platform "

The congress will also feature Domain Lead meetings and a National Leaders Committee meeting, providing valuable opportunities for collaboration and knowledge sharing. We look forward to seeing you there! If you would like to connect during the congress, please feel free to reach out!

Wishing you all a relaxing and joyful Easter break! – The EuroHeart Programme Team
