7. Why are you interested in joining the EACVI Board (300 words max)?

As a past EACVI Research grant winner and a member of several EACVI Committees, I had a great vantage point to realize that high-quality research, education and clinical excellence are inextricably linked.

The EACVI is a vibrant community and a great platform for all cardiac imagers to exchange ideas, learn from each other and thus constantly move cardiac imaging to the next level.

In line with this, my main goals as a potential EACVI board member would be to take part in the development and promotion of high-standard educational and research projects, recommendations and collaboration between the EACVI and national societies.
