8. Why are you interested in joining the EACVI Board (150 words max)?

The first phase for the EACVI – formation – is complete, but now the challenge is to develop a truly integrated association for cardiac imaging, respecting the individual modalities but integrating for greater patient care, research opportunities and influence within the ESC

My experience working for committees and boards of the ESC, European Association of Echocardiography and National Societies will, I hope, enhance the effectiveness of the new Board. My particular interests in quality assurance and certification / accreditation will be key areas to develop over the next years. My role on the ESC Education Committee leading on examinations will be directly relevant to key agendas for the EACVI. I would aim to bring the best of the ESC and its resources eg 'e' learning to the benefit of the EACVI and ensure the EACVI is fully represented within the ESC.
