# Heart failure: preventing disease and death worldwide

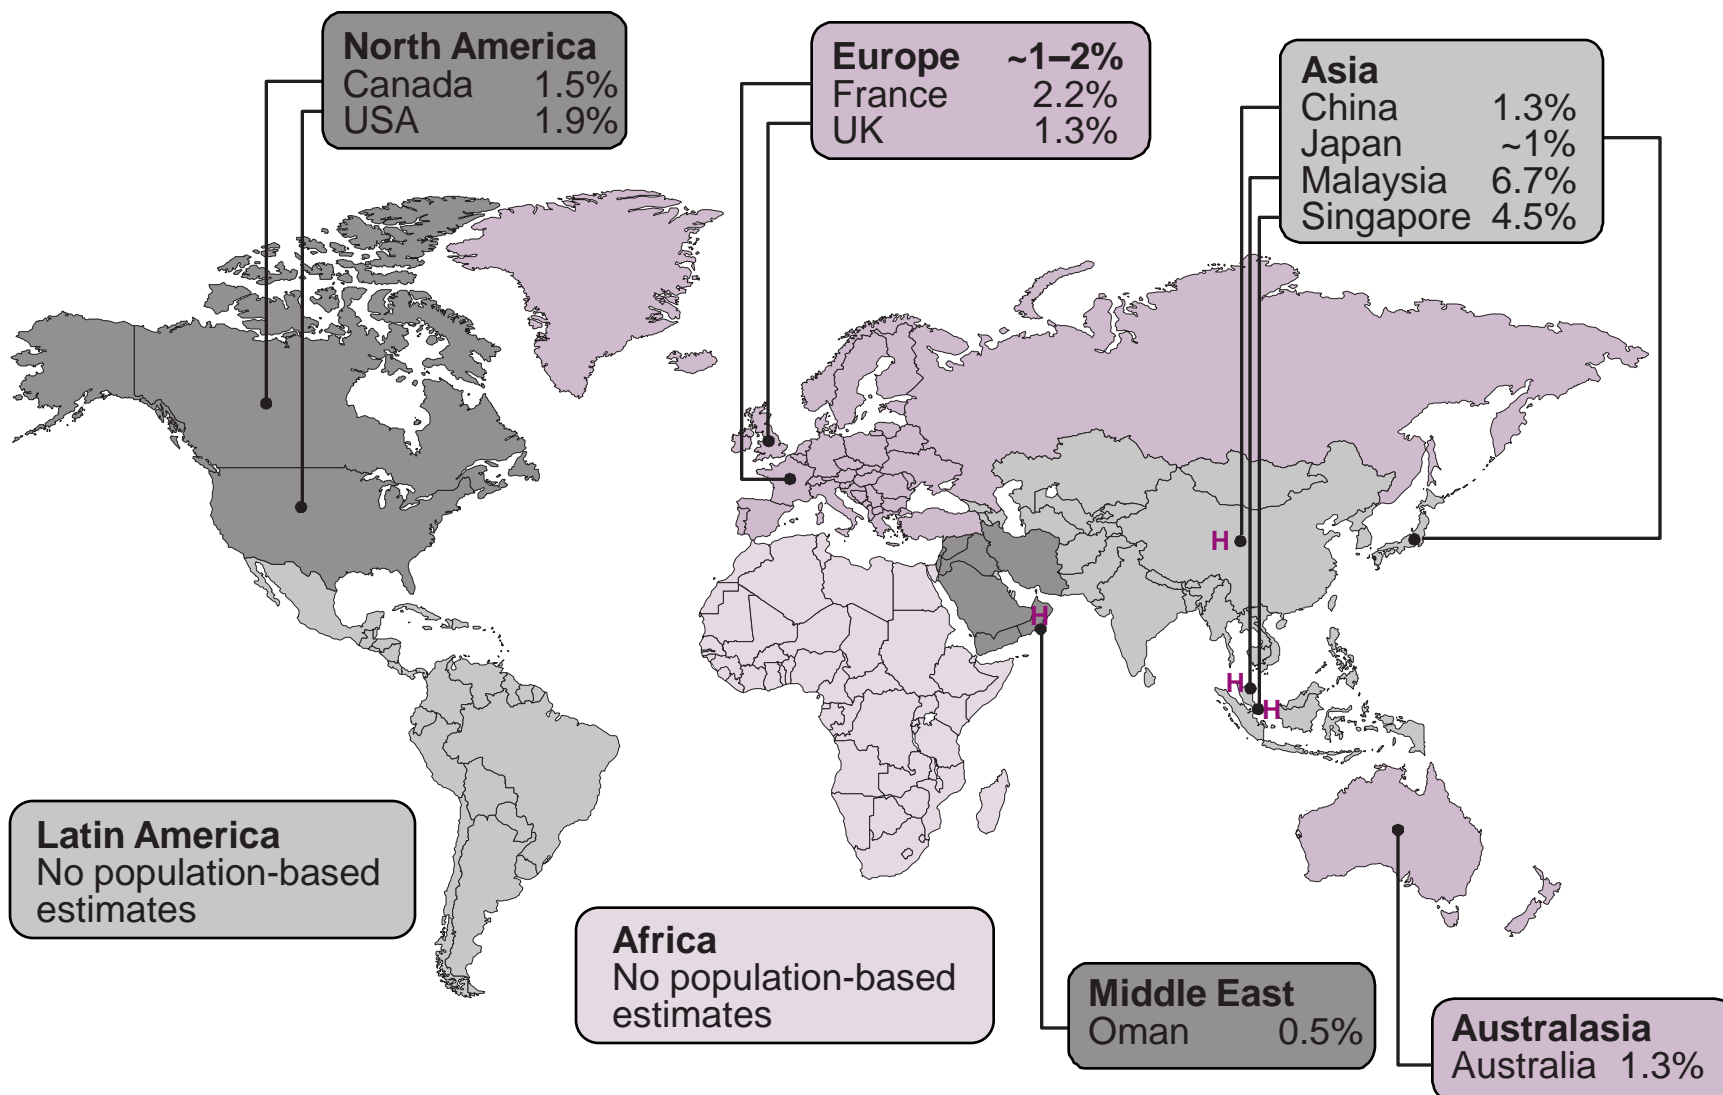

## The global burden of heart failure (Section 1)

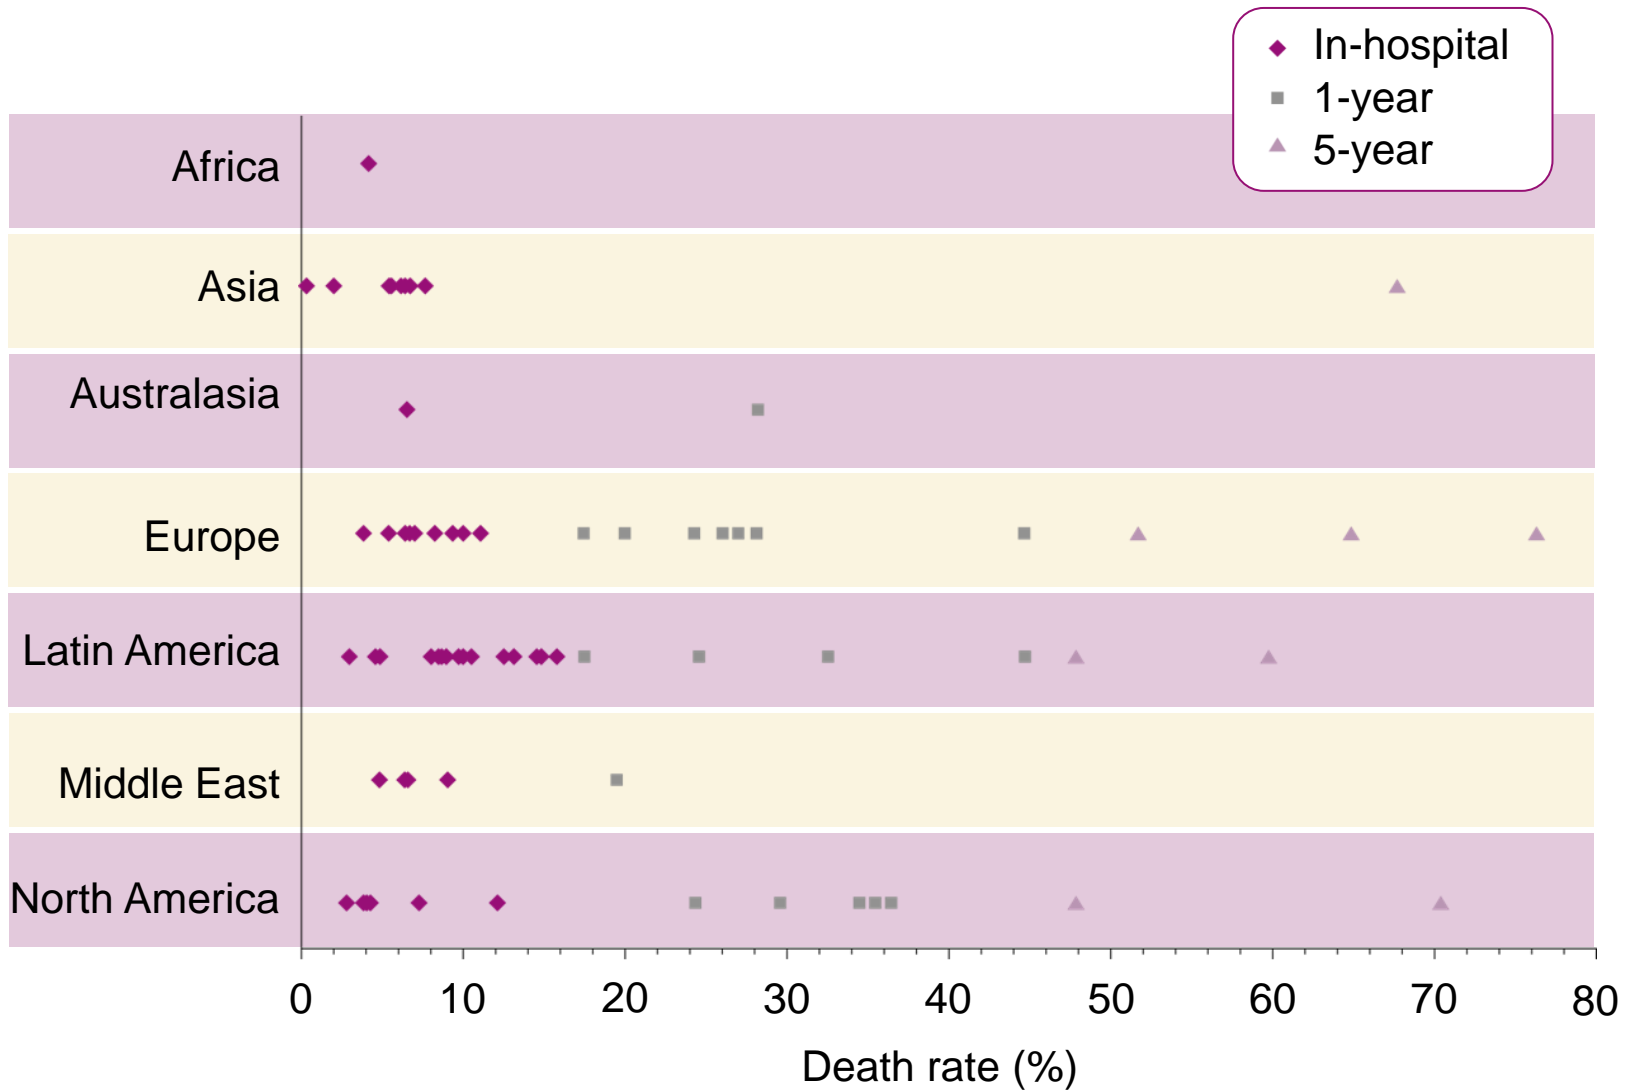

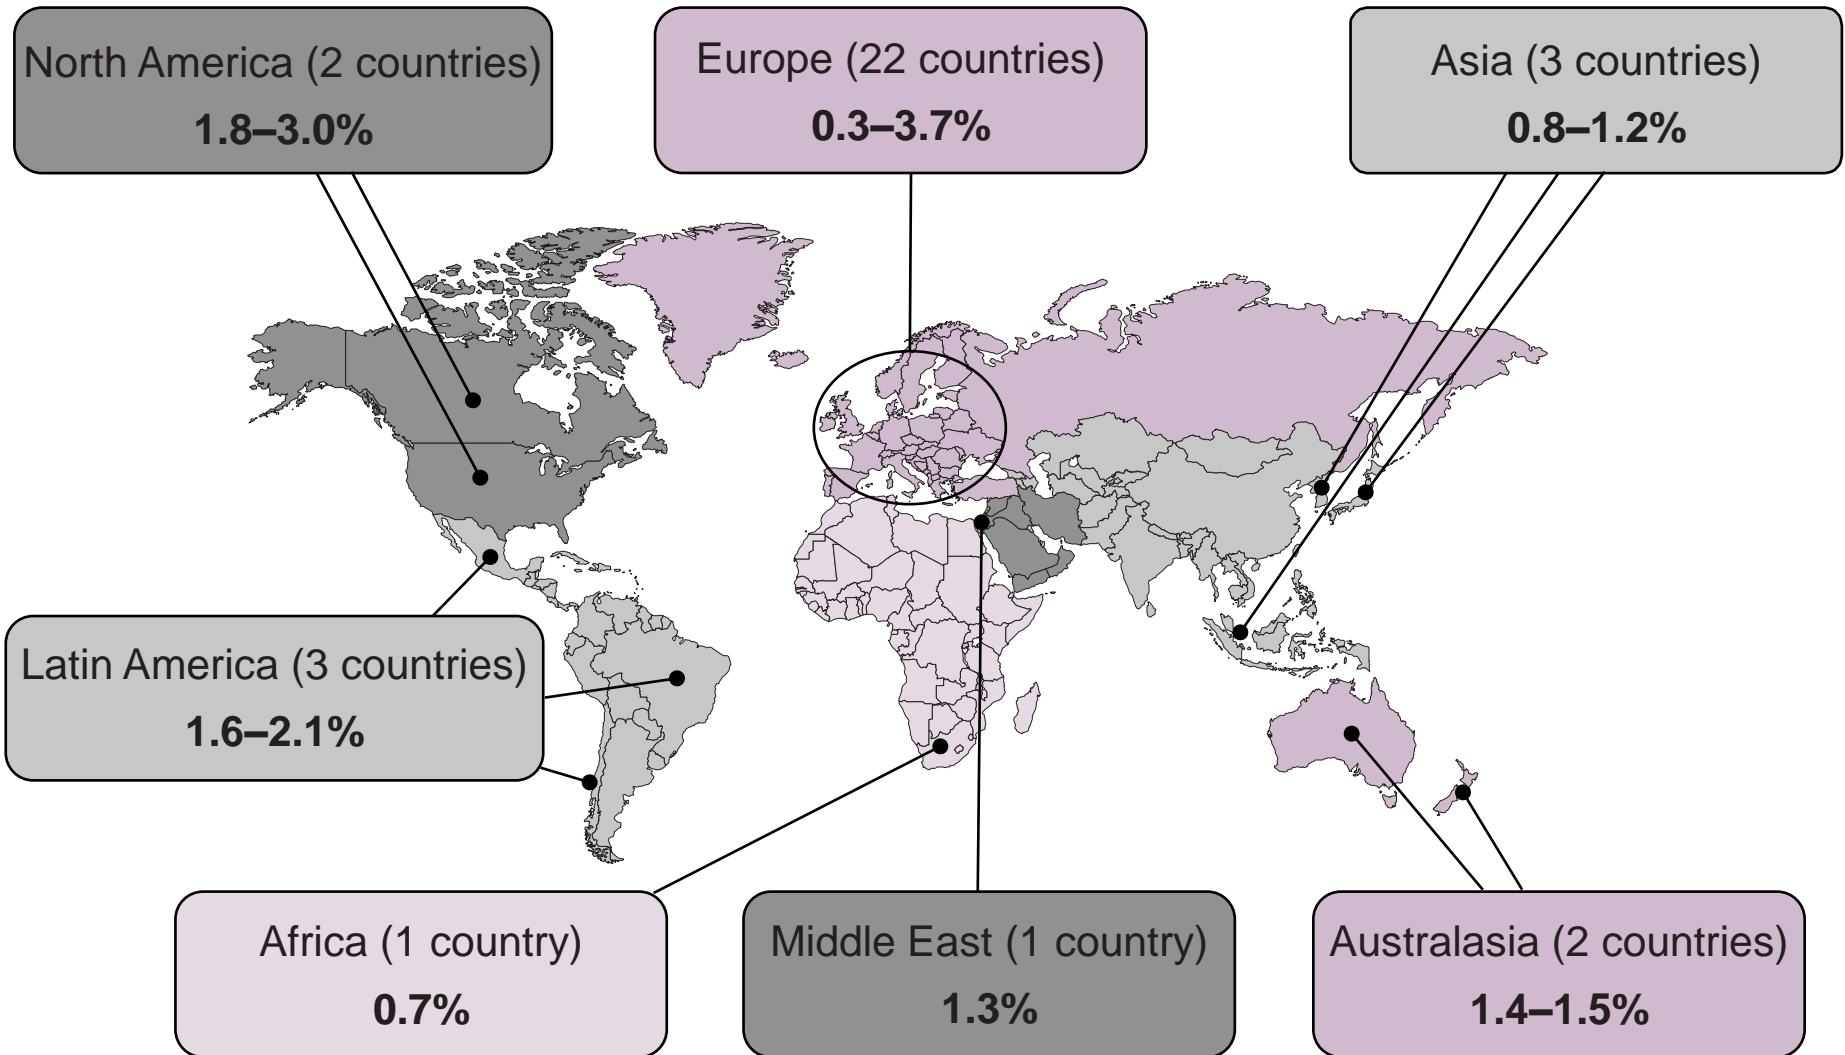

# Heart failure is common

# Heart failure survival rates remain poor around the world

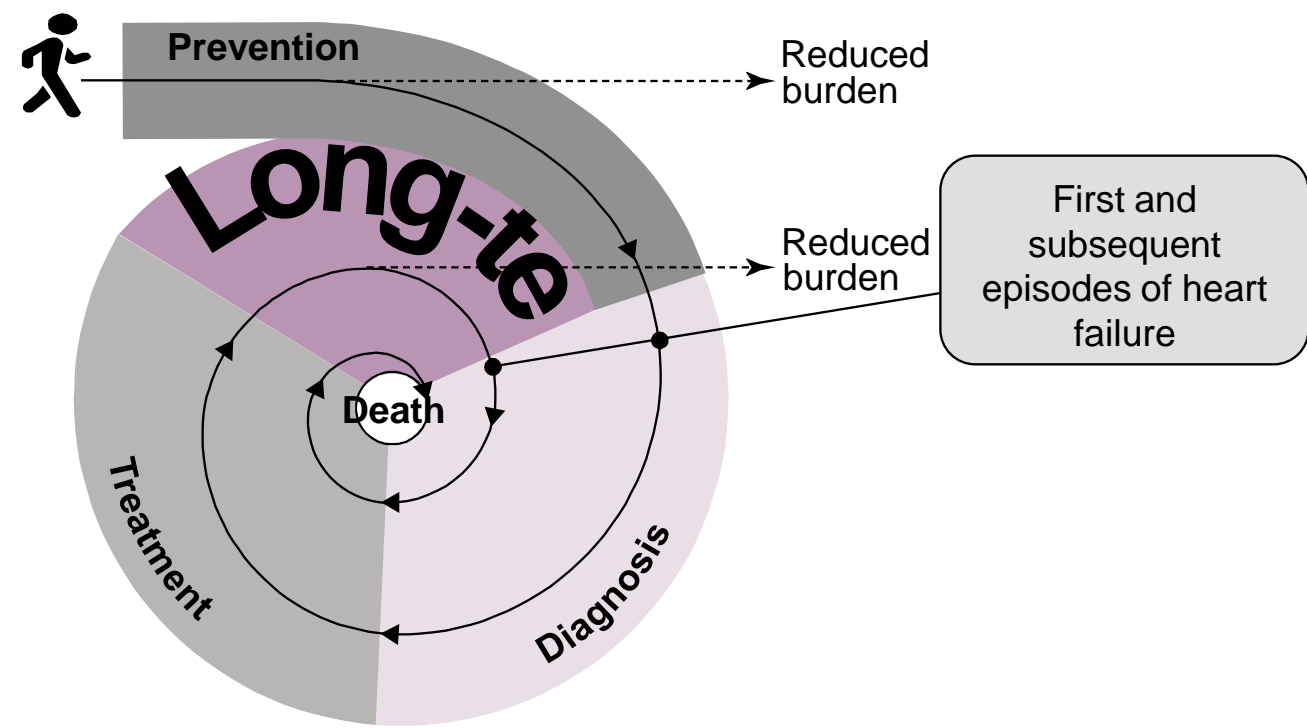

# Proportions of hospital admissions with heart failure as the primary diagnosis

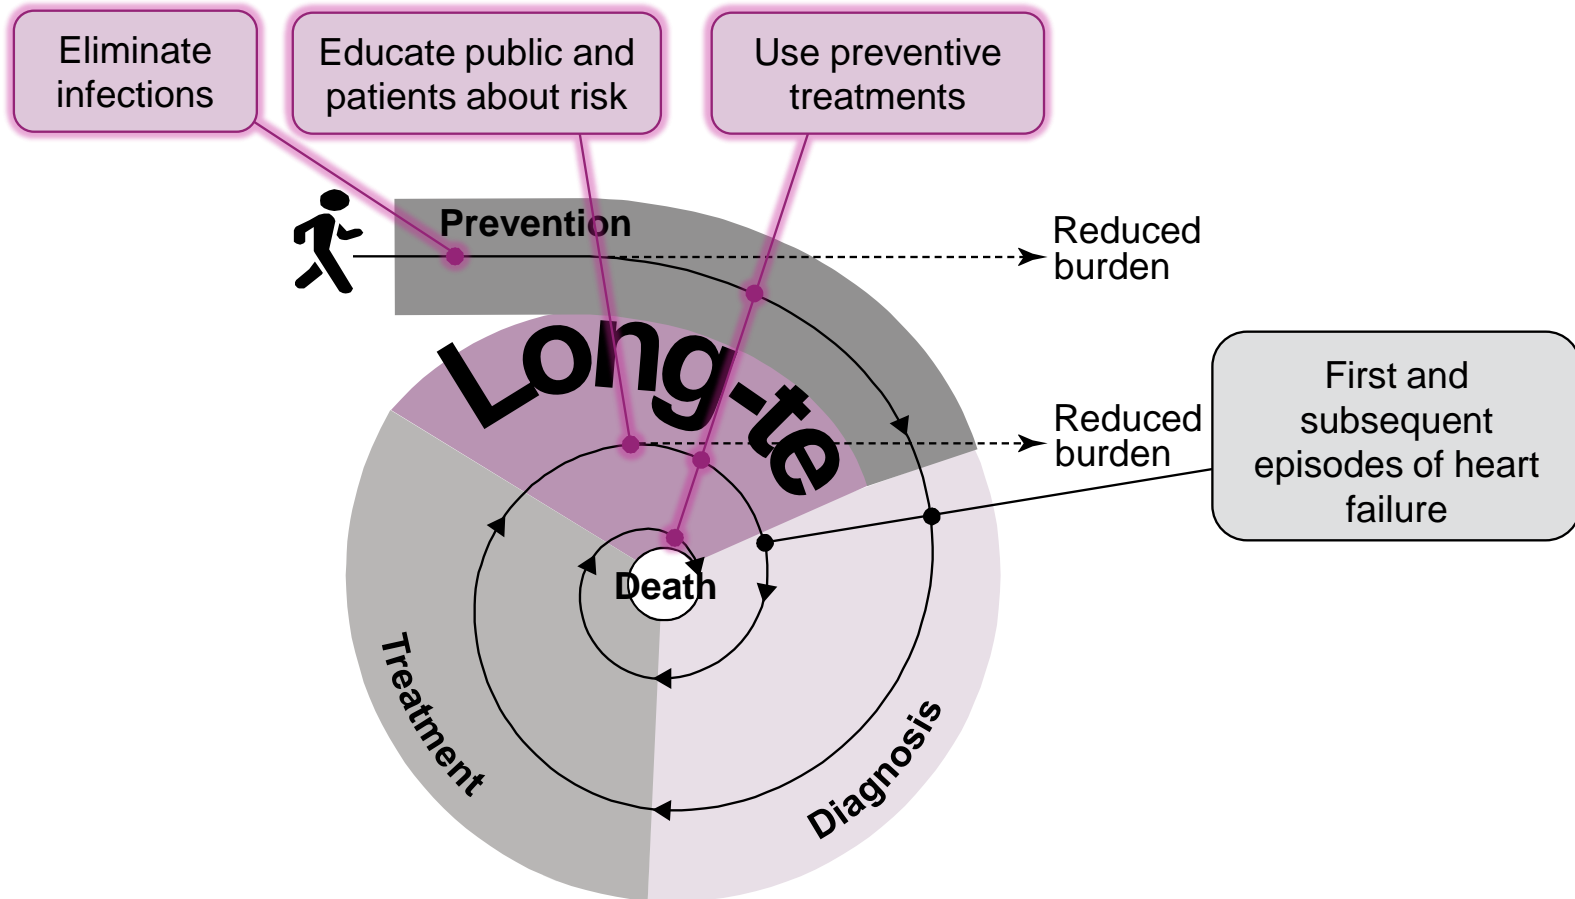

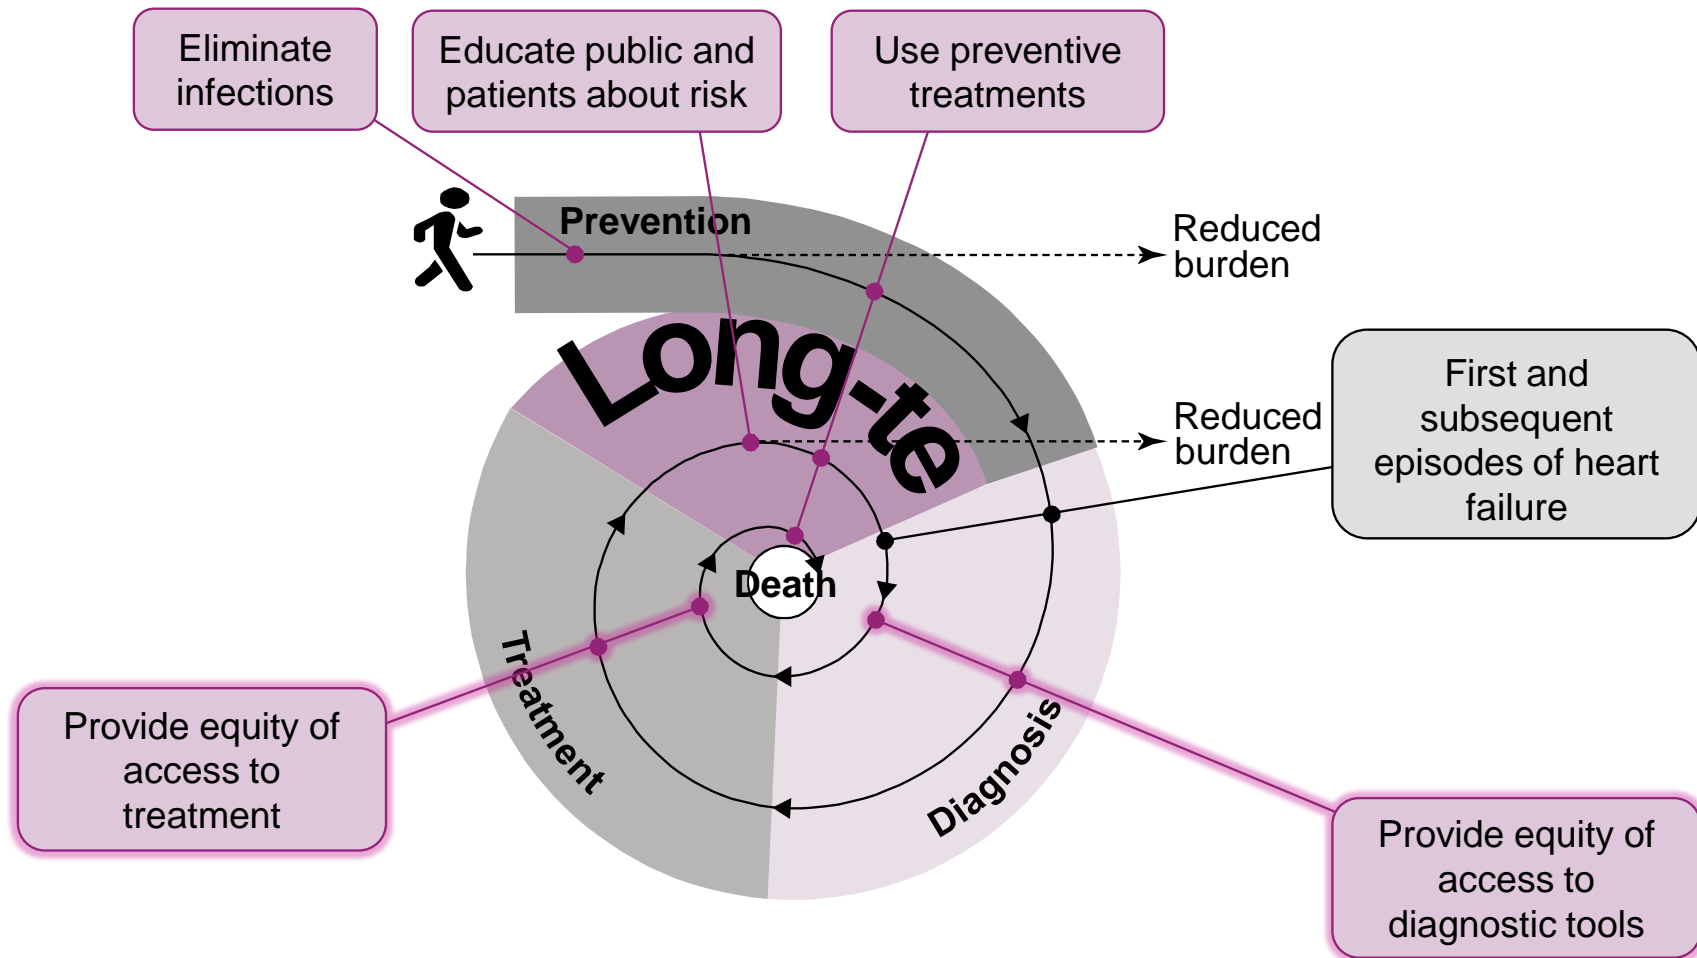

# Heart failure: prevention, diagnosis, treatment and long-term management

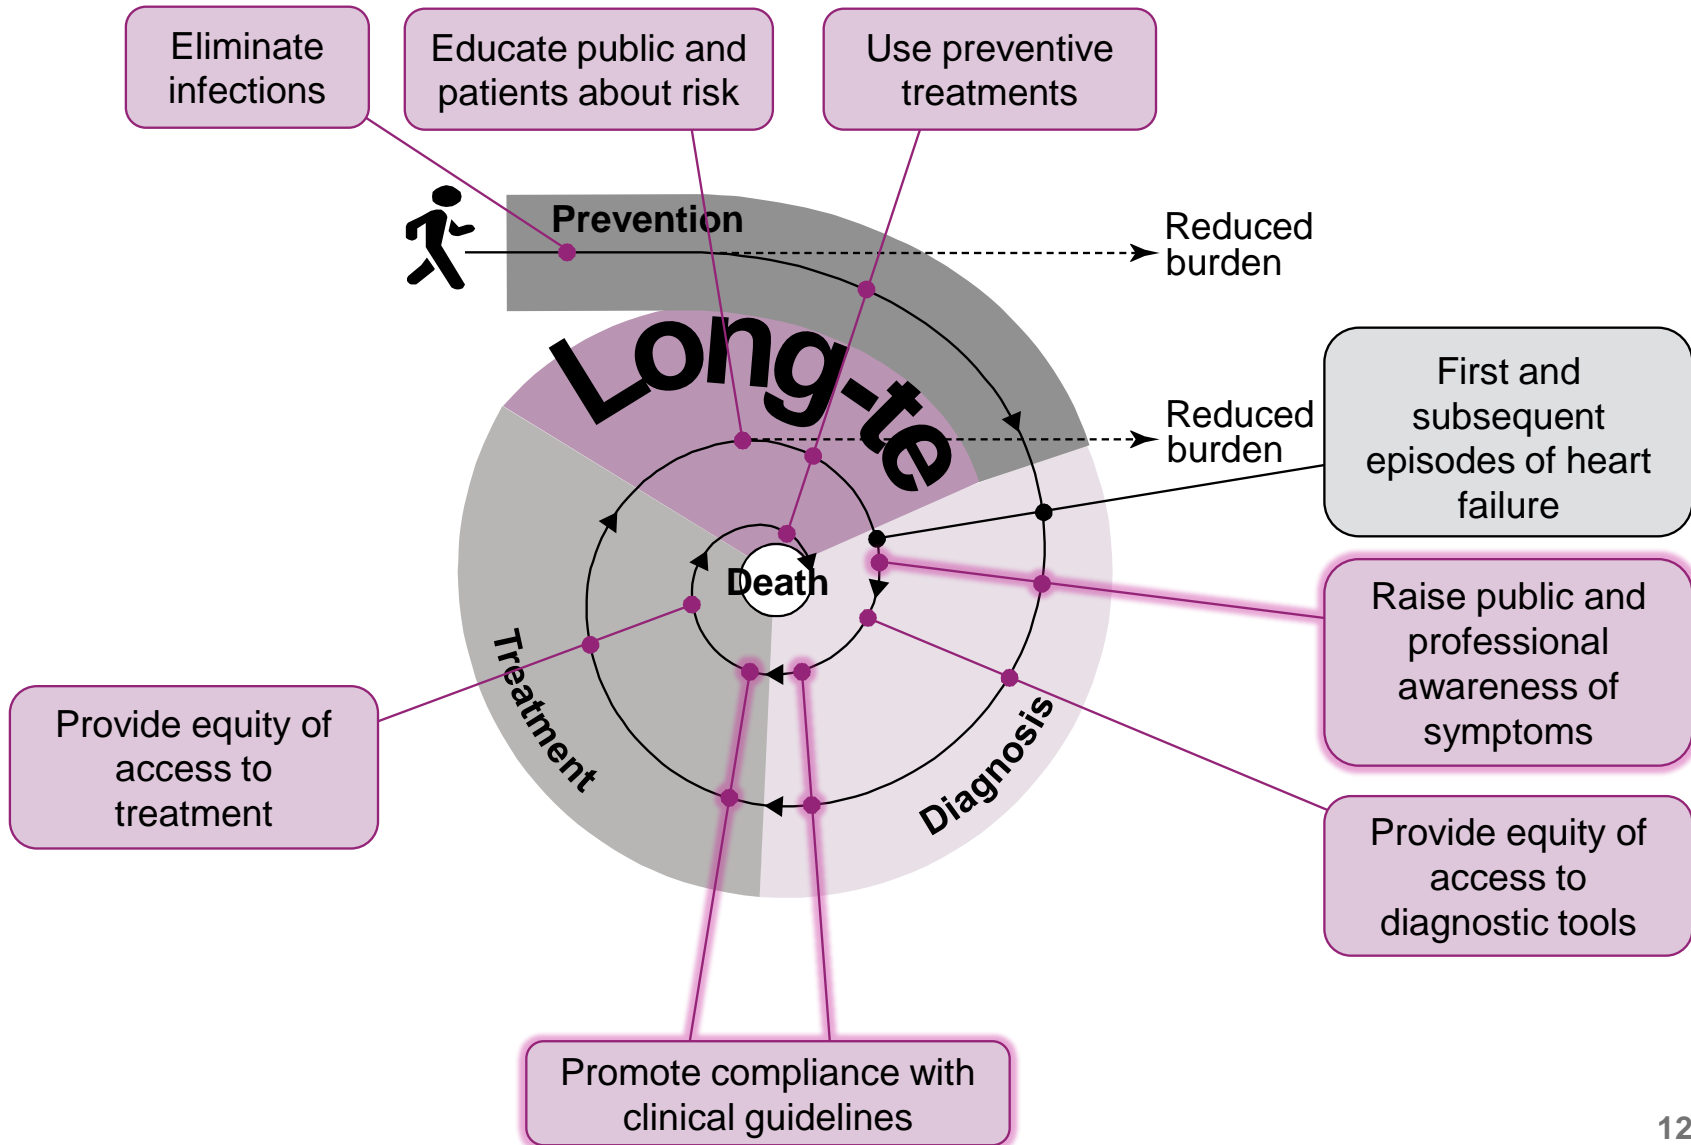

# Policy recommendation: Promote heart failure prevention

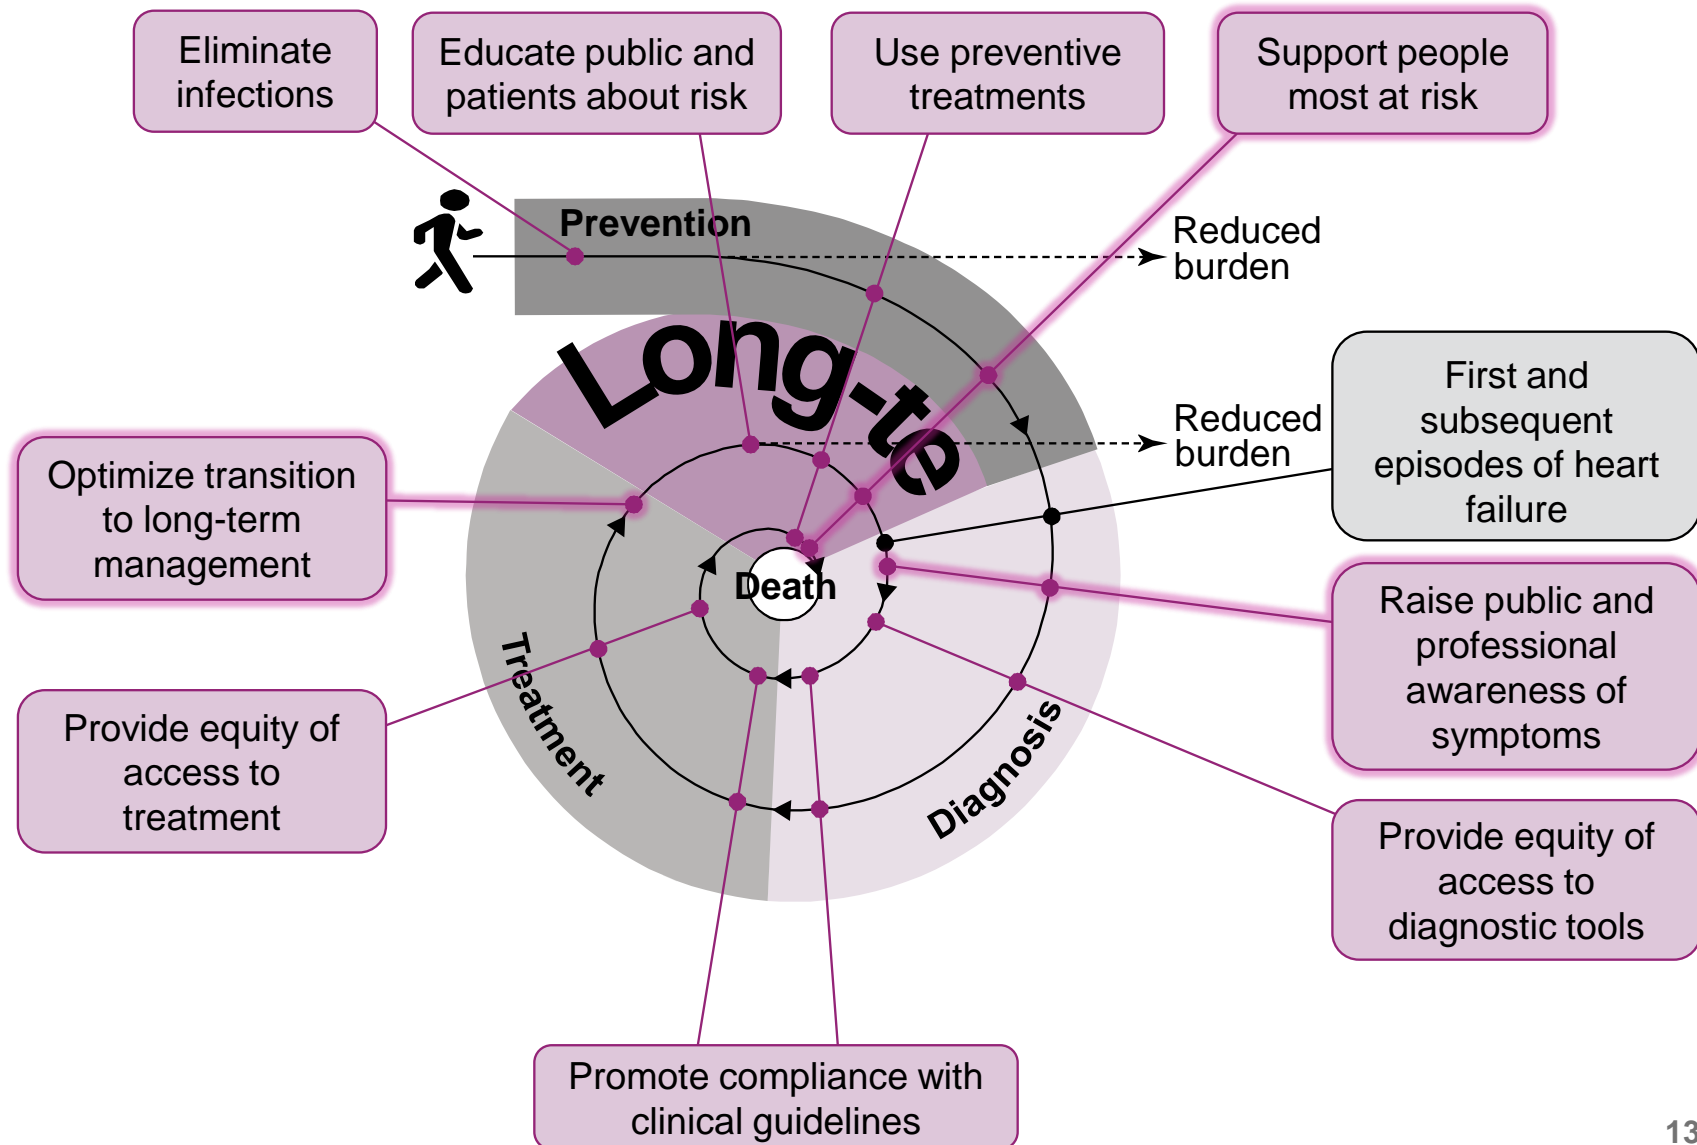

# Policy recommendation: Ensure equity of care for all patients with heart failure

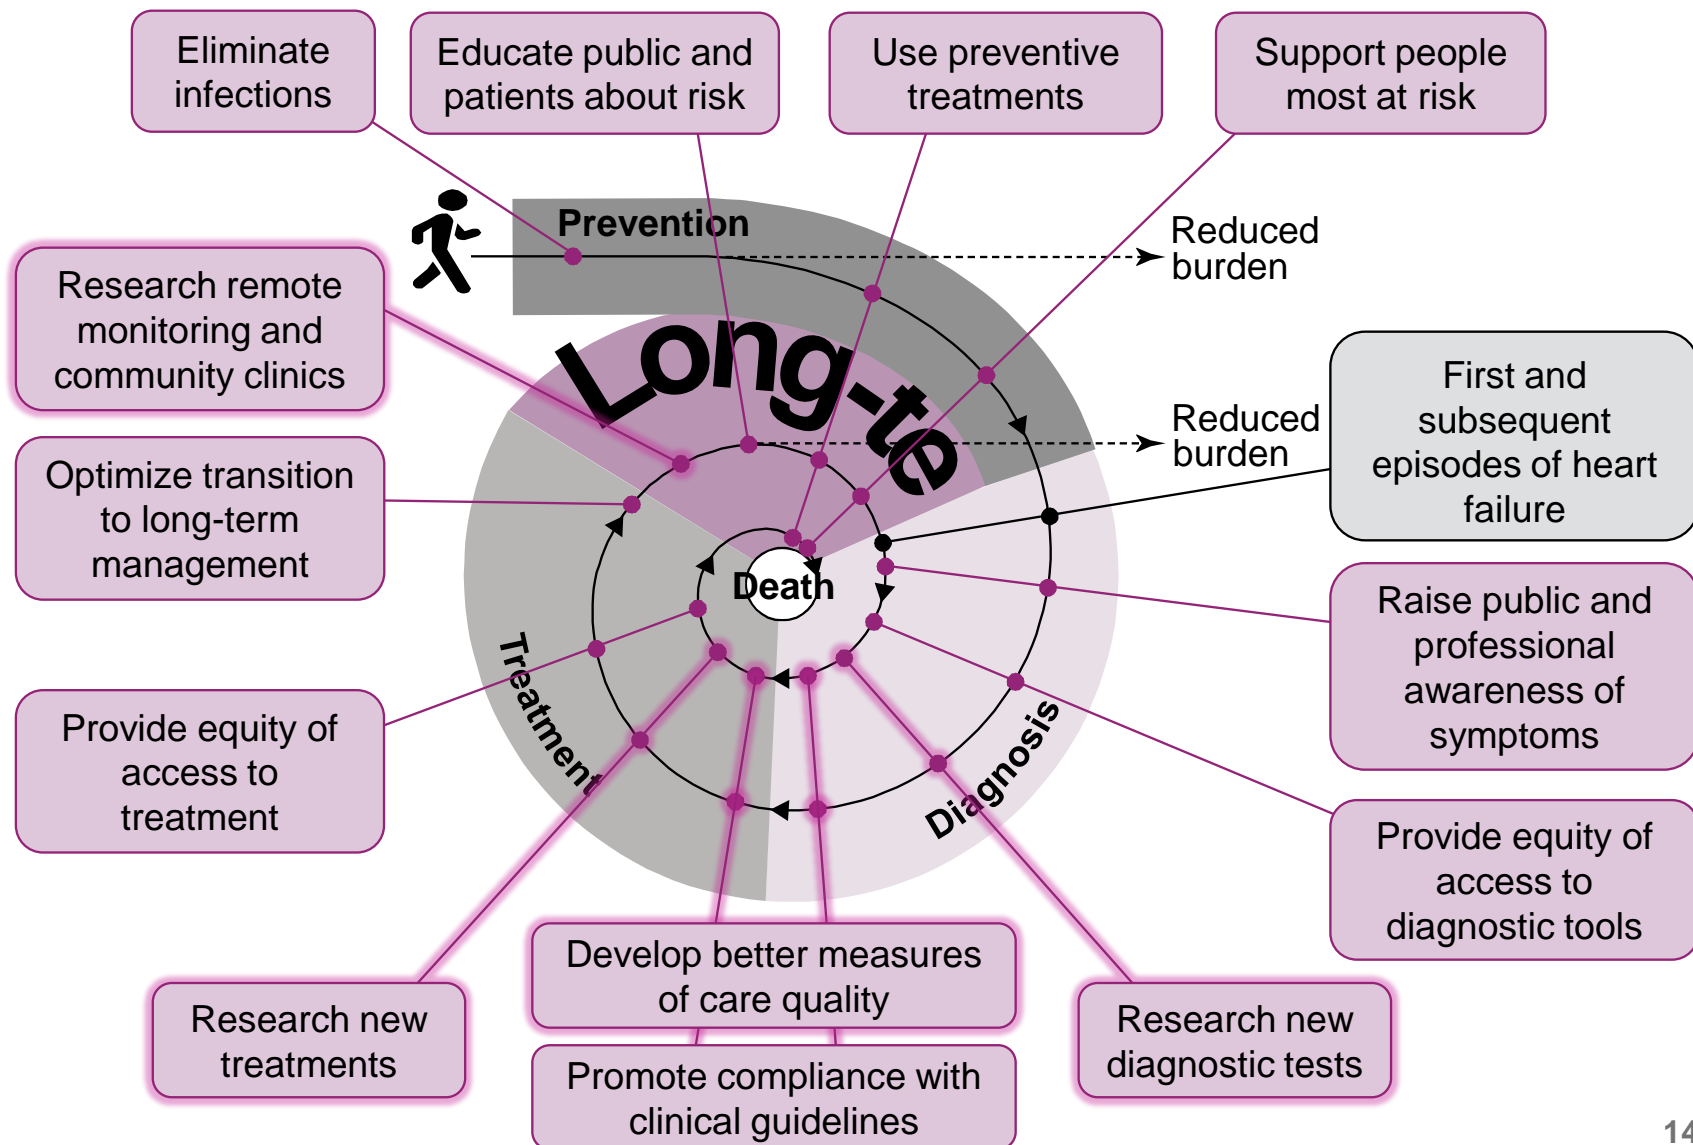

# Policy recommendation: Improve heart failure awareness among professionals

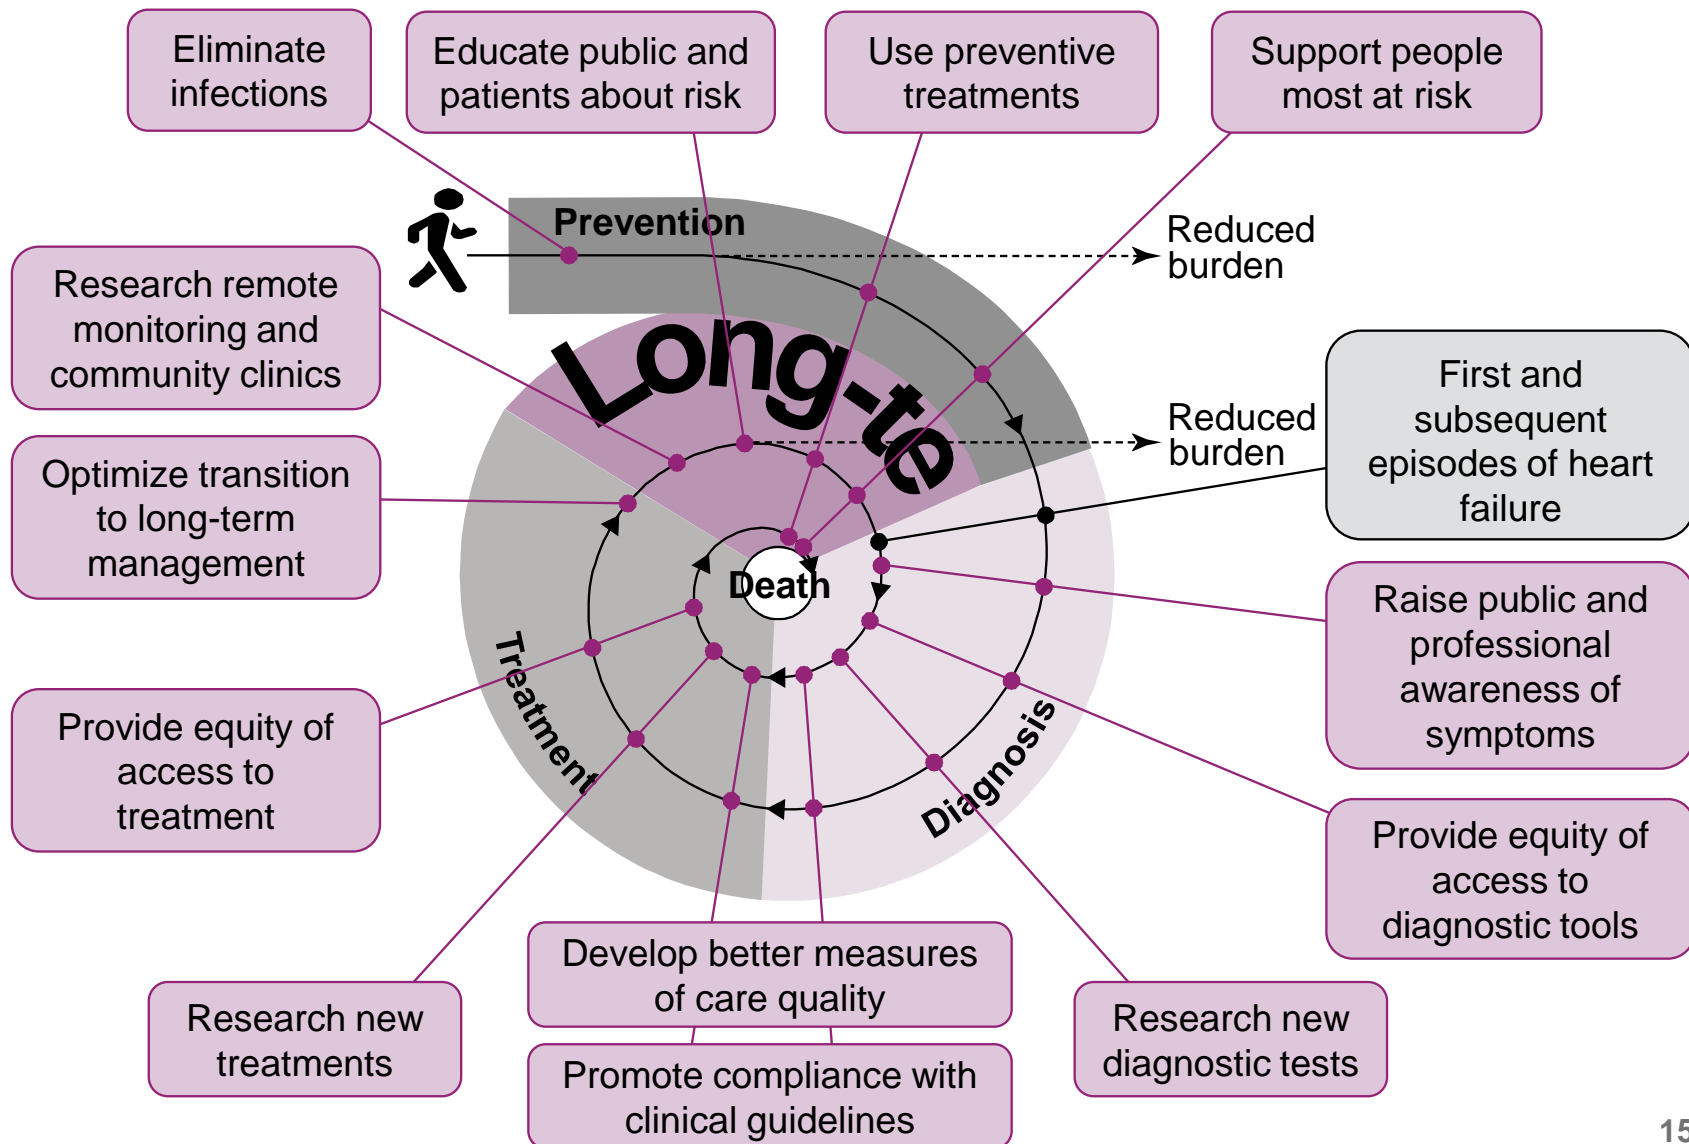

# Policy recommendation: Support and empower patients and their caregivers

# Policy recommendation: Promote heart failure research

# Interventions and unmet needs at all stages of heart failure care

# We urge policy-makers worldwide to collaborate and act on these recommendations

---

Promote heart failure prevention

Improve heart failure awareness among healthcare professionals

Ensure equity of care for all patients with heart failure

Support and empower patients and their caregivers

Promote heart failure research
