## Scientific programme

# Preventing heart failure rehospitalization: a collaborative effort

Chairpersons: **G. Filippatos** (Greece) and **M. Komajda** (France)

### Introduction

**G. Filippatos** (Greece)

Defining the vulnerable heart failure patient

**P. Ponikowski** (Poland)

Ivabradine to improve cardiac function

**C. Maack** (Germany)

Let's decide together how to prevent rehospitalization

Moderator: **M. Cowie** (UK)

Panel: **M. Böhm** (Germany), **J. Borer** (US), **M. Komajda** (France),

**A. Voors** (The Netherlands)

### Conclusion

**M. Komajda**

## PURPOSE

The objectives of this interactive satellite symposium are to share with participants the challenges of managing heart failure patients and to explore current therapies in everyday practice. The focus will be on understanding and improving cardiac efficiency, on treatment optimization with the right timing and without delay, and on treatment personalization depending on comorbidities.

## TARGET AUDIENCE

This scientific program is intended for cardiologists, internal medicine physicians, family practitioners, and other health care professionals involved in the management of heart failure patients.

## EDUCATIONAL OBJECTIVES

- Understand the importance of going further in heart failure treatment optimization in order to achieve timely short- and long-term effects
- Understand via underlying mechanisms how the management of heart failure patients may be optimized
- Comprehend the overall management of the heart failure patient with multiple comorbidities
