Application for a position of nucleus member within the Council on Hypertension

Dear member of the Council on Hypertension,

With pleasure I'm writing you to propose myself as a nucleus member of the Council on Hypertension. I confirm I'll be suitable for this position in the period Sept 2016-Sept 2018 and hope that my previous experience in the field of hypertension will qualify me as a possible candidate.

My interest in arterial hypertension started with my dissertation which was discussed at the University of Pisa under the guide of Prof Antonio Salvetti and Prof Stefano Taddei in 1993; my research activity in the field of hypertension is documented by many publications focused on vascular function and the role of sympathetic nervous activity in control of blood pressure.

After my specialisation in internal Medicine and my PhD in cardiovascular research at the University of Pisa, I move to the University and University Hospital of Zurich, Switzerland where I'm senior consultant, head of a clinical research unit and responsible for the hypertension, lipid and smoking cessation service for outpatient in the University Heart Center, Cardiology as well as lecturer at the Medicine Faculty of the University of Zurich.

I'm honoured to be member of the Italian, Swiss and European Society of Hypertension and since 2014 member of the board of the Swiss Society of Hypertension. In 2015 I joined the ESC Council on Hypertension.

It will be a great pleasure to be able to take more active part in the Council as a nucleus member and contribute to the ongoing work and development of the Council on Hypertension.

Kind regards,

Isabella Sudano, MD, PhD

Attachments: Short CV

CURRICULUM VITAE

Name: Sudano Isabella
Date of birth: 10. June 1968
Nationality: Italian and swiss
Marital status: Married (Noll), one child (Simona, born on 14.10.2005)
Private address: Dora-Staudinger Strasse, 1 8046 Zürich/ Switzerland
Office address: University Heart Center, Cardiology, University Hospital Zürich
Raemistrasse 100, Switzerland
Tel: +41-1-255 58 41 (direct) Fax: +41-1-255 48 59
E-mail: isabella.sudano@usz.ch

UNIVERSITY DEGREES:

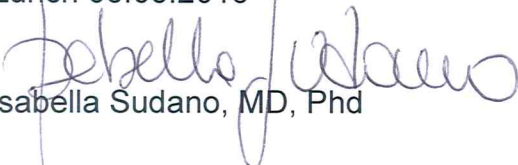

Doctor in Medicine and Surgery, State University of Pisa, Italy, 110/110 magna cum laude, 1993. Doctor Thesis "Effect of potassium on endothelial function in patients with essential hypertension"

POSTGRADUATE APPOINTMENTS:

1993-6 PhD in Cardiovascular Research at the "Scuola superiore di Studi Universitari e Perfezionamento S. Anna - Pisa"
1996 Italian Research Grant of the Italian Society for Hypertension
1997-2003 Specialization in Internal Medicine,
1998 European Society of Hypertension Summer School, Schloss Salzau, Germany
1998-9 International research grant of the Italian Society of Hypertension
1998-9 Fellowship in the University Hospital, Cardiology Unit, Zurich (Director: Prof TF Luscher).
1993-2003 Medical assistant at the University Hospital of Pisa, Internal Medicine, Pisa, Italy. Teaching for medicine students
2003-2009 Medical assistant at the University Hospital of Zürich, Cardiology
February 2006- Responsible for the arterial hypertension, dyslipidaemia and smoking counselling outpatient service at the University Hospital of Zürich, Cardiovascular Center
Januar 2010- Senior researcher and co-head research group, at the University Hospital of Zürich, Cardiovascular Center
13.2.2012 Lecturer for internal medicine at the University of Zürich
April 2013- Senior researcher and head of clinical research group, at the University Hospital of Zürich, Cardiovascular Center

MAJOR RESEARCH INTEREST: Clinical pharmacology of antihypertensive therapy, Local control of peripheral vessels in primary and secondary forms of hypertension, Activity of the sympathetic nervous system and of the baroreceptors with particular focus on arterial hypertension, heart failure and coronary artery diseases, evaluation of the endothelial function in normal subjects, patients with cardiovascular risk factors, arterial hypertension, heart failure and coronary artery diseases, Prevention medicine with particular emphasis on treatment of cardiovascular risk (arterial hypertension, smoking, obesity and metabolic syndrome, dyslipidemia, physical activity)

Zürich 06.05.2016
