AVM

Stroke

Aneurysm

Emergencies

Thromboembolic Stroke

A blood clot that forms within an artery that supplies the brain is called a thrombus. A plaque fragment or blood clot that travels to the brain from the heart or an artery supplying the brain is called an embolus.

Cerebral Hemorrhage

Long term high blood pressure can weaken blood vessels in the brain and eventually cause a hemorrhagic stroke (cerebral hemorrhage).

Acute ischemic stroke

Aneurysm rupture

Vasospasm
