**National CVD Prevention
Coordinator for Turkey**

Short CV

I was born in Istanbul and studied medicine at Istanbul University School of Medicine. After medical school, I continued to my residency in Cardiology Department of Cerrahpasa Medical Faculty in Istanbul University. Since 1996, I have been working at the cardiology department in Kocaeli University. Currently, I am head of the Cardiology Department, head of the division of Internal Medical Sciences, director of the Experimental and Clinical Research Center of Kocaeli University. Management of acute heart failure, risk stratification and cardiovascular imaging are my main interests.

My interest in prevention started with clinical and epidemiological studies on cardiovascular risk factors. I took part in several public health programs, especially on the cardiovascular health of women. I served as a member in Women and Heart Health Committee of the Turkish Society of Cardiology for 6 years **and took part in the Red Alert on Women's Heart Project** (EuroHeart Project, Work package 6).

I currently live in Kocaeli with my husband, who is an interventional cardiologist, and two daughters.
