

European Association of Cardiovascular Imaging

A Registered Branch of the ESC

*To promote excellence in clinical diagnosis, research, technical development,
and education in cardiovascular ultrasound and other imaging modalities in Europe.*

European CMR Certification: LIST OF PROCEDURES FORM

Application for:

Level 2

Level 3

Candidate's full name:

Candidate's email address:

Candidate is requested to submit a list of 150 (Level 2) or 300 (Level 3) studies reported by her/him as detailed in the certification guidance. This list must be signed by the candidate's supervisor.

Supervisor's first and last name:

Signature:

Centre, city, country:

Please note the Certification Assessment Committee may request copies of some of these reports. Thus candidates for CMR certification have to keep this information available until certification is granted.

In the attached logbook, please summarise the primary (main) diagnosis assigned to each case. **Only one primary (main) diagnosis can be assigned to each study.**

Please Note: follow the target guidelines for case mix.

European Association of Cardiovascular Imaging

A Registered Branch of the ESC

To promote excellence in clinical diagnosis, research, technical development, and education in cardiovascular ultrasound and other imaging modalities in Europe.

Level 2 Requirements

Primary (Main) Diagnosis	Required Number	Actual Number
Detection of myocardial infarction and assessment of viability	n/a	
Stress testing with either vasodilator or staged inotropic stress	>25	
Left and right ventricular function assessment	>5	
Aortic, mitral, tricuspid, and pulmonary valve pathology	>5	
Aortic pathology including dilatation and dissection	>5	
Common basic CHD and ACHD (such as coarctation of the aorta, post-operative Tetralogy of Fallot, intracardiac shunts, coronary anomalies)	>25	
Assessment of causation of heart failure	>5	
Assessment of cardiomyopathy phenotype including hypertrophic cardiomyopathy, arrhythmogenic right ventricular cardiomyopathy, dilated cardiomyopathy	>25	
Pericardial abnormality	>5	
Cardiac mass/tumour;angiography of major arteries including aorta, pulmonary, carotid, and renal.	>5	
Total Cases		

European Association of Cardiovascular Imaging

A Registered Branch of the ESC

To promote excellence in clinical diagnosis, research, technical development, and education in cardiovascular ultrasound and other imaging modalities in Europe.

Level 3 Requirements

	Required Number	Actual Number
Primary (Main) Diagnosis		
Detection of myocardial infarction and assessment of viability	n/a	
Stress testing with either vasodilator or staged inotropic stress	>50	
Left and right ventricular function assessment	>10	
Aortic, mitral, tricuspid, and pulmonary valve pathology	>10	
Aortic pathology including dilatation and dissection	>10	
Common basic CHD and ACHD (such as coarctation of the aorta, post-operative Tetralogy of Fallot, intracardiac shunts, coronary anomalies)	>50	
Assessment of causation of heart failure	>10	
Assessment of cardiomyopathy phenotype including hypertrophic cardiomyopathy, arrhythmogenic right ventricular cardiomyopathy, dilated cardiomyopathy	>50	
Pericardial abnormality	>10	
Cardiac mass/tumour; angiography of major arteries including aorta, pulmonary, carotid, and renal.	>10	
Total Cases
