

European Association of Cardiovascular Imaging

A Registered Branch of the ESC

*To promote excellence in clinical diagnosis, research, technical development,
and education in cardiovascular ultrasound and other imaging modalities in Europe.*

EACVI/AEPC Congenital Heart Disease (CHD) LIST OF 250 PROCEDURES

Taken from a consecutive 24 month period submitted no later than 12 months after sitting the exam

Candidate number:

(This is stated on the exam result letter/logbook in order to maintain confidentiality, do not indicated your name)

Candidate is requested to submit a list of 250 echocardiography studies performed by her/him.

This list must be signed by candidate's supervisor.

Supervisor's first name and surname:

Signature:

Candidate's Centre, City, Country:

Please note: *The case mix will depend on the candidate's centre and it may be difficult for some candidates to obtain cases from each category. It is not mandatory to include cases from each category although that would be ideal.*

The candidate's supervisor must ensure that the case mix reflects the workflow of the particular centre and that the logbook attempts to represents the full range of congenital heart lesions.

It is important that normal cases do not constitute > 30 % of the logbook.

European Association of Cardiovascular Imaging

A Registered Branch of the ESC

To promote excellence in clinical diagnosis, research, technical development,
and education in cardiovascular ultrasound and other imaging modalities in Europe.

Summarise the primary/main diagnosis assigned to each case. **Only one primary/main diagnosis can be assigned to each study.**

| Primary Diagnosis | Number of cases |
|---|-----------------|
| Septation defects | |
| Atrioventricular discordance | |
| Arterioventricular discordance | |
| Left heart obstructions | |
| Right heart obstructions | |
| Patent duct | |
| Situs anomalies, isomerism | |
| Postoperative congenital heart disease | |
| Endocarditis | |
| Left Ventricular Hypertrophy | |
| Hypertrophic Cardiomyopathy | |
| Dilated Cardiomyopathy | |
| Right Heart Failure | |
| Pericardial Disease | |
| Mass/Thrombus | |
| Coronary anomalies | |
| Miscellaneous | |
| No significant cardiac abnormality - <30% | |
| Total cases | |

Please note: The target guidelines for case mix - although **not** absolute requirements and some flexibility based on the case mix of your instruction will be acceptable.
