7. Why are you interested in joining the EACVI Board (150 words max)?

I believe in the need to make EACVI more visible and friendly in all European and other countries. I have also the international relations education. Also I am doing social master education degree about health care management. All these are giving me some other social and organizational perspectives other than medicine education.

I believe that I can be extremely helpful to provide new viewpoints, to bring new frontiers to the EACVI as a representative of a country with a huge population and approximately 2500 cardiologist. All of these are the reasons why I have a strong interest in joining the EACVI Board.

I hope to contribute to advancing the scientific and professional role and to be a part of EACVI board in the future.
