

EAPCI Board 2020-2022 Elections

Fina Mauri, MD PhD FESC

Candidate running for President-Elect 2020-2022

My objectives

I will work for our mission

- To reduce the burden of cardiovascular disease through percutaneous cardiovascular interventions.

To increase the sense of belonging to EAPCI for National Interventional Working Groups or for the National Cardiac Societies

- Through the commitment to expand the proposal of the ESC and the EAPCI to put the focus on the patient.
- Expanding the culture of measuring the patient's point of view, both with the experience in the processes of interventional Cardiology and in clinical outcomes.
- Raising awareness of EAPCI's instruments designed specifically for interventional cardiology (EAPCI PREMS and EAPCI PROMS)

sense of belonging of National WG

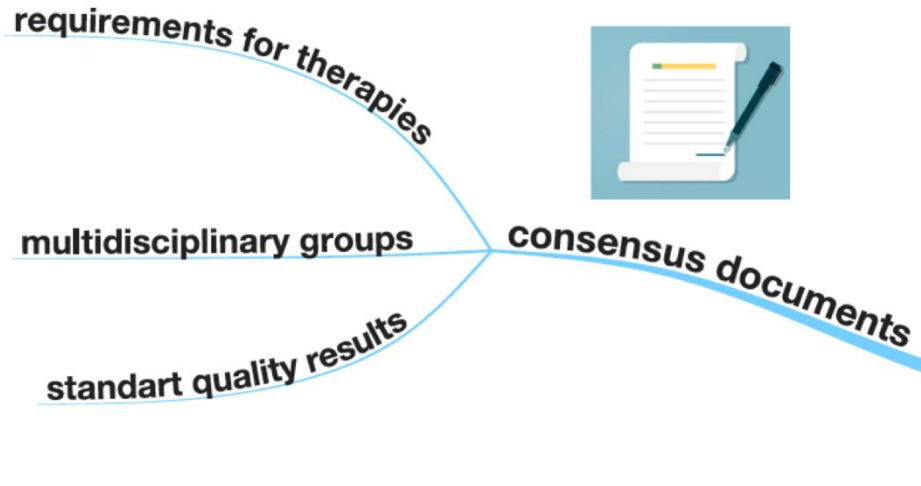

focus on patient

patient point of view

EAPCI PREMS & PROMS

To create consensus documents in order to establish the requirements (minimums and ideals) set for each hospital for the different interventional therapies

- It is a fact that scientific societies, as well as the sanitary authorities of ESC Member Countries, need specific and official recommendations of basic requirements for each particular hospital.
- This will ensure more effective, safer and higher quality results in order to perform the increasingly wide-ranging interventionist treatment possibilities.
- Our proposal is to create multidisciplinary groups of professionals belonging to different countries and from different socioeconomic levels to agree on these requirements.
- Our goal is to emphasize the minimum requirements set for each hospital in order to achieve standard quality results.

To commit to Gender Equality

- We recognize that the scientific world and, therefore, the interventional cardiology world, cannot reach its full potential without incorporating the talent of both men and women.
- As it has been proven, actions and initiatives supporting gender equality carried out by isolated individuals have not been enough to move towards gender equality.
- Our proposal is to further work towards the achievement of true gender equality with the integral commitment and active role of men and women in leadership positions within the EAPCI and its Congresses.
- We will direct the efforts to stop the loss of female talent in professional and scientific careers and to empower women in leadership positions as equal to that of men.

women and men talent

commitment of leadership positions

empower leadership positions = to men
