4. Why are you interested in joining EHRA Board (150 words max)?

I have been involved in several different roles in ESC, EHRA, and other scientific organisations. I will carry my all international and multidisciplinary experience to EHRA Board.

I will work hard to increase the visibility of EHRA in all ESC member countries and in the world. I want to contribute to reduce regional disparities in arrhythmology across all ESC countries.

Improvement in the international work on clinical research and improvement in the EP lab facilities and the distribution of EP labs in the ESC area will be my priorities.

Continuous, well designed education programs for the young physicians and allied professionals in all the ESC countries are extremely important.

More rewards and advantages should be introduced for the members of EHRA, especially for the young electrophysiologists.

And, finally I will do my best to make every member of the EHRA feels that "Yes, this is my association".

5. How will you coordinate your EHRA appointment with your daily clinical/research workload?

I am a full time university professor. I am not working in a private clinic. So, I will have enough time for EHRA Board activities. Not only education, research, and patient care but also international affairs are always in the priorities of my institution. I will therefore, be able to combine my task within the EHRA Board with my clinical and research work. All well planned.
