

Dear friends and colleagues,

As you will see below, I have been involved in several different roles in ESC, EHRA, and other scientific organizations. I will carry my all international and multidisciplinary experience to EHRA Board.

My number of citations (without self-citations) are almost ten thousand. So, I will also carry my scientific experience to the board.

I am involved in many ESC Guidelines as task force member and reviewer, and chaired four EHRA lead position or consensus papers.

I will work hard to increase the visibility of EHRA in all ESC member countries and in the world.

I want to contribute to reduce regional disparities in arrhythmology across all ESC countries. I do believe that, we need closer collaboration with national bodies.

Improvement in the international work on clinical research and improvement in the EP lab facilities and the distribution of EP labs in the ESC area will be my priorities.

Continuous, well designed education programs for the young physicians and allied professionals in all the ESC countries are extremely important.

More rewards and advantages should be introduced for the members of EHRA, especially for the young electrophysiologists.

For the future of EHRA, we do need more active members from all ESC countries. We have to work together to make our association the largest and also the most dynamic association of the ESC.

I will do my best to make every member of the EHRA feels that **“Yes, this is my association”**. It is my dream.

Kindest regards.

Prof.Bulent Gorenek, FESC
