

EHRA SUMMIT 2014
*'The end of the European
welfare state'*

Agenda and Objectives

C. Leclercq

Rennes University Hospital, France

Evolution in Medicine

- **Modifications in the demographics of the patients**
- (older, modifications of the diseases over time...)

- **Modifications in the demographics of the physicians (less physicians (governmental restrictions) , more women...)**

- **Modifications of the medical treatment**
 - Pharmacological and non pharmacological therapies especially in EP
 - From symptoms-based treatment to prevention and therapeutic education

- **Modifications of the validation and application of treatments**
 - EBM, Guidelines, EMA....
 - New rules for clinical research

- **Modifications of the ECL (European Cardiologic Landscape)**
 - New regulations (more transparency but an increase in complexity)
 - New concepts and rules for education
 - New economic context..... Less money...
 - New rules for relationship between physicians and manufacturers, administrations, health insurance, economists and politicians
 - New rules for scientific societies
