

## **Working Group #16 on Peripheral Circulation**

### ***Annual Report 2004/05***

Our WG for peripheral circulation ESC is organized in a cluster with the WG for coronary circulation and stroke. We are currently discussing the possibilities of forming a new cluster with working groups whose field of expertise is closer to ours (namely WG for drug therapy and hypertension).

We will be organizing two joint symposia and one Focus session at the ESC annual congress in Stockholm.

This year we will also be organizing a joint symposium at the annual meeting of the Mediterranean Association of Cardiology and Cardiac Surgery in Portoroz (in September 2005), a joint symposium at the European Chapter Meeting of the International Union of Angiology in Glasgow (in October 2005) and also two joint symposia at the Mediterranean League of Angiology and Vascular Surgery congress in Palermo (also September 2005).

Our working group currently has 75 members.

In regard with our financial situation there are currently ca. 11.000 euros in our fund, with which we intend to so co-finance the above mentioned symposia.
